Installation Guide BL188C Strobe Power Supply

Automotive: Serial Communication

Safety First

This document provides all the necessary information to allow your Whelen product to be properly and safely installed. Before beginning the installation and/or operation of your new product, the installation technician and operator must read this manual completely. Important information is contained herein that could prevent serious injury or damage.

- **Proper installation of this product requires the installer to have a good understanding of automotive electronics, systems and procedures.**
- **If mounting this product requires drilling holes, the installer MUST be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins. Also de-burr any holes and remove any metal shards or remnants. Install grommets into all wire passage holes.**
- **If this product is mounted with tape or Velcro™, clean the mounting surface with a 50/50 mix of isopropyl alcohol and water and dry thoroughly.**
- **Do not install this product or route any wires in the deployment area of your air bag. Equipment mounted or located in the air bag deployment area will damage or reduce the effectiveness of the air bag, or become a projectile that could cause serious personal injury or death. Refer to your vehicle owners manual for the air bag deployment area. The User/Installer assumes full responsibility to determine proper mounting location, based on providing ultimate safety to all passengers inside the vehicle.**
- **For this product to operate at optimum efficiency, a good electrical connection to chassis ground must be made. The recommended procedure requires the product ground wire to be connected directly to the NEGATIVE (-) battery post.**
- **If this product uses a remote device to activate or control this product, make sure that this device is located in an area that allows both the vehicle and the device to be operated safely in any driving condition.**
- **Do not attempt to activate or control this device in a hazardous driving situation.**
- **If this product contains strobe light(s), halogen light(s) or high-intensity LED's, do not stare directly into these lights. Momentary blindness and/or eye damage could result.**
- **Use only soap and water to clean the outer lens. Use of other chemicals could result in premature lens cracking (crazing) and discoloration. Lens' in this condition have significantly reduced effectiveness and should be replaced immediately. Inspect and operate this product regularly to confirm its proper operation and mounting condition. Do not use a pressure washer to clean this product.**
- **It is recommended that these instructions be stored in a safe place and referred to when performing maintenance and/or reinstallation of this product.**
- **FAILURE TO FOLLOW THESE SAFETY PRECAUTIONS AND INSTRUCTIONS COULD RESULT IN DAMAGE TO THE PRODUCT OR VEHICLE AND/OR SERIOUS INJURY TO YOU AND YOUR PASSENGERS!**

Notice!

This BL188C strobe power supply can be installed in many different types of vehicles. The guidelines for the installation of this product are written so that no matter what vehicle is being used, the installation and operation of the BL188C will be simple and straight forward.

Selecting a mounting location...

The logical choice for a mounting area would be a trunk or similar compartment. However, due to the wide variety of vehicles onto which the BL188C could be installed, this is not always possible. The following guidelines will help the installer select an acceptable alternative:

- A) The BL188C should be mounted on a metal surface to aid heat dissipation. Be sure that this surface is not one that either generates or is exposed to excessive heat during normal operation of the vehicle.
- B) Do not select a location where the BL188C will be exposed to potential damage from any unsecured or loose equipment in the vehicle.
- C) Be sure the area selected will not allow the BL188C to be exposed to water!
- D) When routing the BL188C's wires, it is important to choose a path that will keep these wires away from excessive heat and from any vehicle equipment that could compromise the integrity of the wires (ex. trunk lids, door jams, etc.).

WARNING! All customer supplied wires, that connect to the positive (+) terminal of the battery, must be sized to supply at least 125% of the maximum operating current, and fused "at the battery" to carry the load!

WARNING! When extending the communication wires (BLUE & GREY), similar "twisted pair" wires MUST be used!

When the best mounting location has been determined, securely fasten the BL188C to it's mounting surface using the supplied hardware.

Caution: *As it will be necessary to drill holes into the mounting surface, the installer MUST be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins!*

Addressing your BL188C...

If there is to be more than one BL188C installed on a single vehicle, it will be necessary to set the network address on both units. As you will see, the dip switch banks for the BL188C power supply is configured at the factory as Address 0001. In this configuration (dip #1 ON - all other's OFF), this BL188C will be identified to the B*LINK network with address "0001". If more than one BL188C is installed on a single vehicle, subsequent BL188C's must change their dip switch settings as follows:

As shown here, to configure a BL188C as Address 0001, dip switch 1 must be in the "ON" position and all other switches must be "OFF".

To configure as Address 0002, dip switch 2 must be "ON" and all other switches (including #1) must be "OFF". Address 0003 will have dip switch 3 "ON" and all others "OFF". Address 0004 has dip switch 4 "ON" and all others "OFF"

Refer to your Multi-Purpose Controller operating manual for information on how to operate the BL188C strobe power supply.

- OUTLETS 1 & 2 = FLASH ALTERNATELY
- OUTLETS 3 & 4 = FLASH ALTERNATELY
- OUTLETS 5 & 6 = FLASH ALTERNATELY
- OUTLETS 7 & 8 = FLASH ALTERNATELY
- OUTLETS 1, 3, 5 & 7 = FLASH SIMULTANEOUSLY
- OUTLETS 2, 4, 6 & 8 = FLASH SIMULTANEOUSLY
